***How to calculate ton-miles:** **Method 1** - Multiply the distance of each movement by the weight in tons to get ton-miles for individual shipments. Sum all ton-miles for individual shipments to get total ton-miles.

Method 2 - Compute the average length of haul (total miles/total shipments) for your operations. Then multiply this average haul by the total number of actual tons transported in intercity service. (Multiplying the total tons of all movements by the total miles of all movements produces an erroneous result and should not be used.)
